

AAKASH PAI

BSc (Hons) Computer Science Student | Kuala Lumpur, Malaysia

INTERNSHIP PERIOD: JAN 2027 – APRIL 2027

aakashpai2007@gmail.com | 01123776040

linkedin.com/in/aakash-pai | github.com/kashals | aakashpai.dev

LOCATION: Mont Kiara, Kuala Lumpur

OWN TRANSPORTATION: Yes

Career Objective

Driven and solutions-oriented Computer Science undergraduate with practical experience in full-stack web development, RESTful Application Programming Interfaces (APIs), and distributed systems architecture. Seeking the Junior Software Engineer position at eKomas to leverage technical expertise in software development, backend logic, and database management to deliver reliable enterprise software solutions.

Education

Sunway University, Sunway City, Selangor, Malaysia

Sep 2025 – Sep 2027

BSc (Hons) Computer Science

(Expected)

- In Progress | **Dean's List Award** – February 2026 Semester 5, Faculty of Engineering and Technology
- **ACE Scholarship** – RM 11,000/year tuition reduction, awarded on the basis of Diploma CGPA 3.83/4.00

Sunway College, Sunway City, Selangor, Malaysia

Aug 2023 – Aug 2025

Diploma in Information Technology

- **CGPA:** 3.83 / 4.00
- **Relevant Coursework:** Web Development, Database Fundamentals, Mobile Application Development, Object-Oriented Modeling, Java Programming, Systems Analysis & Design, Computer System Architecture

Work Experience

Frontend Developer Intern, InQuantum AI, Kuala Lumpur, Malaysia

Apr 2025 – Aug 2025

- Designed and built the User Interface and User Experience (UI/UX) for xPulse, an internal Artificial Intelligence (AI) platform used across the company.
- Completed a frontend assessment by reverse-engineering a full-stack real-time chat application from a visual reference, integrating provided backend Application Programming Interfaces (APIs) to deliver a fully working product end-to-end.
- Built workflow automations using n8n and implemented production-quality UI animations with Framer Motion.

Technical Projects

Sugar And Icing | sugarandicing.vercel.app | github.com/kashals/sugar-and-icing

Jan 2025 – Present

- Production-grade e-commerce platform for a local bakery with server-authoritative Stripe checkout, Cloudflare Turnstile bot protection, and Upstash Redis rate limiting.
- Implemented atomic stock deduction via Supabase Remote Procedure Calls (RPC) and a role-gated admin dashboard with real-time revenue analytics.
- **Stack:** Next.js 15, TypeScript, Supabase, Stripe, Upstash Redis, Tailwind CSS

- Built during MyHack 2026 at Sunway University – a containerized AI decision-support system that processes pitch decks through Gemini 2.5 Flash async batch queues, mapping venture constraints against live relational data.
- Includes an Explainable Artificial Intelligence (XAI) chat interface for real-time decision auditing, deployed on Google Cloud Run.
- **Stack:** Python, Streamlit, Gemini API, Docker, Google Cloud Run, Pandas

Distributed API Gateway & Throttling Core |
github.com/kashals/distributed-rate-limiter-gateway

May 2026

- Built a production-grade API gateway in pure Go that enforces per-user rate limits globally across horizontally scaled replicas, with all throttling state managed in Redis.
- Implemented two pluggable rate-limiting algorithms – Token Bucket (lazy refill via HSET) and Sliding Window Log (ZSET-based) – both executed as atomic Lua scripts inside Redis to eliminate distributed race conditions.
- JSON Web Token (JWT) middleware supports HS256 and RS256; verified identity is injected as X-User-ID into downstream headers while stripping the raw Authorization header before proxying.
- **Stack:** Go, Redis, Lua

Core Competencies & Technical Skills

Proficient: TypeScript, JavaScript, Python, Go, Next.js, React, Node.js, PostgreSQL, Supabase, Git, Tailwind CSS

Intermediate: Java, Lua, HTML5, CSS3, Docker, Redis, Google Cloud Run, n8n Workflow Automation, Streamlit, Figma

Extracurricular Activities & Achievements

- Participated in **MyHack 2026** (GDG Hackathon) at Sunway University, building an AI-powered venture decision-support system within a strict 24-hour timeframe.
- Active member of the **Sunway Cybersecurity Club**, Sunway University, engaging in technical workshops on web vulnerabilities and system security.
